

APPLICATIONS ENGINEER AT ARBURG USA

WIR SIND DA.

The ARBURG group is a leading manufacturer of plastic processing machines worldwide. With about 3,300 employees, we are considered the epitome of innovation in the plastics industry.

We expect:

- /// Experience as an application engineer in plastics and rubber technology or comparable industry
- /// Four year technician / engineering degree, post graduate work in the field of injection molding
- /// Technical experience with sophisticated processing applications such as PIM, LSR, multi component, etc. and a high level of customer orientation, energy, and consulting competence

What you can expect at ARBURG:

- /// To provide high level technical support to ARBURG Regional Sales Representatives and customers
- /// Studying and evaluating customer requests and recommend specific equipment and processing solutions
- /// Travel across the USA to make customer calls and presentations with ARBURG Sales Representatives, as well as to provide trainings to staff and customers

We offer State of the art work environment, with international orientation and a global presence. We honor high performance and support personal development.

Please submit your application documents to our U.S. Human Resource Department at Danielle_Braca@arburg.com
